EXPERIENCE

Scholar Fund · Technical Lead

Feb. 2023 - Current

- Architect scalable and maintainable software solutions that align with business goals
- Develop high-quality, efficient, and robust code using best practices in software engineering
- Allocate engineering resources, workloads, and task prioritization to maximize productivity
- Lead planning, execution, and delivery of technical projects within budget and on schedule
- Collaborate with product, design, and other stakeholders for project requirements
- Create and maintain tech, design, and architectural documentation for all software
- Ensure delivery of high-quality, maintainable code

Okta (Auth0) · Software Engineer

Sept. 2021 - Current

- Lead a dynamic team in an Agile approach to set and execute project management goals
- Iterate and improve an enterprise management product with observability as a major guide
- Initiate knowledge sharing process to eliminate silo issue and "bus rule"

CircleCI · Software Engineer

May 2021 - Sept. 2021

- Deliver code iterating on execution environments within a large multi-tenant fleet of build servers
- Improve upon an existing culture of observability and monitoring
- Act as an agile coach for each team including day-to-day efficiencies and iteration-to-iteration improvements

Clause · Full Stack Engineer

Feb. 2019 - Apr. 2021

- Collaborate with teams to develop a React-based full digital contract environment with customizable integration flows
- Manage risks and dependencies of building proprietary software on top of open source architecture
- Research technologies and libraries to incorporate into the tech stack, based on informed trade-offs
- Establish operational processes and coding standards involving Git, project management, and other workflow standards
- Spearhead accessibility adherence and implementation of both WCAG 2.0 A and AA compliance
- Drive the partnership with Women Who Code and developing resources for diversity, ethics, and hiring processes
- Work closely with the Director of Engineering for necessary team and process development needs
- Facilitate team meetings, demos, and alignment calls to support required business goals
- Create a positive atmosphere, facilitating core team-meetings, and finding methods to increase team focus

PROJECTS

Accord Project Technical Steering Committee

Sept. 2020 - Sept. 2022

- Orchestrate structure, priorities, and documentation for an open source ecosystem of software tools for smart legal contracts
- Execute involvement in Google Summer of Code 2020-2021, leading to an outcome of four major projects for the organization
- Lead project structure for DigitalOcean's Hacktoberfest in 2019-2020, resulting in over 10x community engagement
- Act as voice of both users and developers, ensuring all project tasks remain focused on goals
- Initiate development management process, aligning contributors with community goals and creating transparency
- Lead community communications for identifying requirements and providing regular status updates

Accord Project Maintainer

Feb. 2019 - Mar. 2022

- Responsible for technical project management of developer tools for user interaction with smart legal contracts
- Contribute to overall plan roadmap, create and manage issues and releases as well as documentation for most repositories
- Minimize unplanned work, and mitigated risks via organized meetings for cross-functional communication
- Handle any cross-team dependencies and proactively bridge any barrier
- Mentor developers as an acting manager, involving weekly 1-1s and manager's evaluations
- Manage user stories and align right activities with minimal redundant work

OUTREACH

Built By Girls · Advisor June 2019 - Oct. 2021
Mentor early college-aged women interested in tech in network building, portfolio skills, and technical knowledge

Speaker + Author Winter 2018 - Current
Deliver talks for multiple conferences and written on various technical and non-technical topics in the software field

CERTIFICATIONS

Certified ScrumMaster® · Scrum Alliance Dec. 2022

AWS Certified Cloud Practitioner · Amazon Web Services (AWS) Feb. 2021

SKILLS

MANAGEMENT

Atlassian JIRA + Confluence
Git + GitHub
Datadog
Kibana
Sentry

COMPETENCIES

Project Management
Training + Mentoring
Process Improvement
Agile + Scrum
Communication + Organization

LANGUAGES

JavaScript + TypeScript
Node.js + Deno
React + Redux
Golang
Jest + Chai

EDUCATION

GRACE HOPPER AT FULLSTACK ACADEMY 2018
Software Development Immersive

OKLAHOMA STATE UNIVERSITY 2008 - 2010
Economics, Pre-Law
