EXPERIENCE

Clause · Full Stack Engineer
New York, NY
Feb. 2019 - Current

- Collaborate in a team of five to develop solutions for the main web app to handle full contract functionality with customizable flows and clauses
- Develop solutions for stylized and functional UI components and menus within main web app to handle smart contract creation and execution
- Implement collaborative workflows with git and accessibility compliance habits within the engineering team priorities and roadmap

NYC Department of Education · Budget and Ops Associate
Brooklyn, NY
May 2017 - Sept. 2018

- Advanced automation for the NYC Teaching Academy's Per Session payroll system, reducing processing time and errors by 50% and persisting all records
- Collaborated with strategy and policy teams to manage a budget and payroll system that handled 450+ teachers biweekly with structure and tracking

Langlinais Massage Therapy · Owner
Remote
Apr. 2014 - Sept. 2018

- Owned and operated mobile holistic health business in multiple regions; adapted ads and media presence to ever-changing internet landscape
- Handled client retention, medical documentation, and record keeping; branded in cities including Los Angeles, Berkeley, New Orleans, and New York

Mission: Heirloom · Director of Operations
Berkeley, CA
Feb. 2014 - Apr. 2015

- Managed a staff of 20 between commissary kitchen and cafe; coordinated hiring, training, scheduling, and working with purveyors
- Interfaced systems with new tech for a farm-to-table delivery distribution system partnering with Amazon Fresh; pivoted with the release of new tech

PROJECTS

Accord Project
2019

- Maintainer at an open source ecosystem of technology neutral software tools for smart legal contracts, and member of the technology working group
- Contribute to overall plan roadmap, create and manage issues and releases as well as documentation for most repositories
- Develop dynamic and accessible inline editor for building, editing, and testing smart agreements through a mono repo of UI components

Template Studio
2019

- Develop a web app which can construct, modify, process, and test smart clauses through redux state management with asynchronous saga flows
- Maintain a foundational Contract Editor, an environment in which a template object can be parsed and manipulated with markdown and Cicero templates

OUTREACH

Built By Girls · Advisor
June 2019 - Current

Mentor early college-aged women interested in tech. Facilitate industry connections for network building. Develop portfolio skills and technical knowledge.

SKILLS

LANGUAGES + LIBRARIES	JavaScript + Node.js, SQL + PostgreSQL, Ergo + Cicero, Solidity, Socket.io, HTML5 + CSS3
SOFTWARE + FRAMEWORKS	React + Redux, Express, Webpack, Mocha + Chai + Enzyme + Jest, Sequelize
TOOLS + VERSION CONTROL	Git + GitHub, Atlassian, Heroku, OAuth, Passport, Cucumber

EDUCATION

Grace Hopper at Fullstack Academy
Software Development Immersive
May 2018 - Dec. 2018

Oklahoma State University
Economics, Pre-Law
2008 - 2010
